

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Carver Elementary School

Our water system violated several drinking water standards over the past quarter. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During Quarter 3, 2024 we did not monitor or test for perchlorate and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant we did not properly test for during the last quarter, how often we are supposed to sample for perchlorate and how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Perchlorate	1 sample every quarter	0	July 2024–September 2024	Q4 2024

What happened? What is being done?

We failed to collect a quarterly water sample to analyze perchlorate levels between the months of July and September of 2024. We will be collecting a sample by the end of December 2024 to ensure that perchlorate in the water remains at an acceptable level.

For more information, please contact Kelly Boudreau with SWSS at 978-486-1008 or email boudreau@swss.biz.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
